Animals Including Humans

Key Vocabul	/ocabulary			
adult	A fully grown up animal or plant.			
develop	To grow and become stronger.			
life cycle	The changes living things go through to become an adult.			
offspring	The child of an animal.			
reproduce	When living things make a new living thing of the same kind.			
young	Offspring that has not reached adulthood.			
live young	Offspring that has not hatched from an egg.			

All young animals change at different stages as they grow into adults.

All living things **reproduce** and have **offspring**.

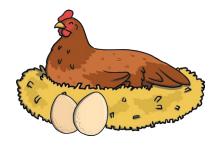

Other animals have offspring which do not look like

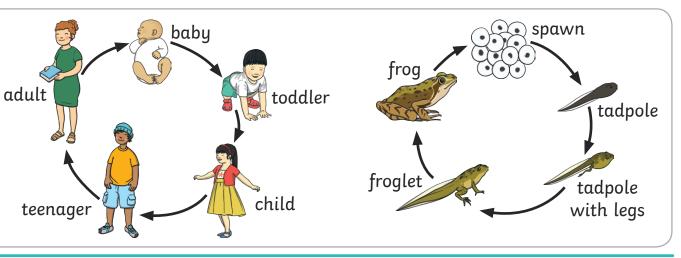

them, e.g. fish and amphibians.

and

Some animals lay eggs which hatch into live young. This **young** then develops into an **adult**.

When these eggs hatch, some animals look like their adult, e.g. birds and reptiles.
